PROFESSIONAL SUMMARY

Versatile Full Stack Developer with 4 years of hands-on experience building enterprise applications using TypeScript, React, and Node.js ecosystems. Specialist in microservices architecture and cloud deployment (AWS/Azure). Proven track record of delivering complex healthcare platforms and industrial automation solutions with a focus on code quality, performance optimization, and scalable architecture. Combines strong technical expertise with collaborative team skills and a passion for emerging AI/ML technologies.

CORE TECHNICAL SKILLS

Frontend Development:

- React, NextJS, TypeScript, JavaScript, HTML5/CSS3
- **UI Libraries:** Material UI, Tailwind CSS
- **State Management:** Redux, Context API, Recoil
- **Mobile:** Flutter, Dart, React Native
- **Testing:** Jest, React Testing Library, Cypress

Backend Development:

- Node.js, NestJS, Express, TypeScript
- RESTful API Design, GraphQL, WebSockets
- **Authentication & Security:** OAuth, JWT, RBAC
- Python, FastAPI

Database & Storage:

- SQL: PostgreSQL, MySQL
- NoSQL: MongoDB, Firebase
- ORM: TypeORM, Prisma, Mongoose
- Cache: Redis

DevOps & Infrastructure:

- Cloud: AWS (EC2, S3, Lambda), Azure, Vercel
- Containerization: Docker, Docker Compose
- CI/CD: GitHub Actions, Azure DevOps
- Monitoring: Sentry, Datadog

Methodologies & Tools:

- Agile/Scrum, Git, GitHub, BitBucket
- Microservices Architecture, API-First Design
- Performance Optimization, Code Reviews

PROFESSIONAL EXPERIENCE

1. Project Manager / Full Stack Developer at NomadEngenuity | April 2024 – Current

• Seezy Project:

Led full-stack development of Seezy, an eye care plan management platform:

- Architected a scalable microservice solution using NextJS and NestJS with TypeScript that improved data processing speeds by 35%
- Implemented efficient RESTful APIs and GraphQL endpoints handling 1000+ daily transactions
- Optimized database queries and implemented caching strategies, reducing response times by 40%
- Configured CI/CD pipeline on Azure, enabling automated testing and zero-downtime deployments
- Created reusable component libraries that accelerated UI development across multiple projects

- **PharmaSee Project:**

Successfully developed PharmaSee, a healthcare staffing platform:

- Built responsive front-end with React, implementing advanced filtering and matching algorithms
 - Designed and implemented real-time notification system using WebSockets
 - Created secure authentication system with role-based access control
 - Optimized mobile experience resulting in 65% of platform usage coming from mobile devices
 - Implemented automated testing achieving 85% code coverage
-

2. English – Portuguese Interpreter at UIO Languages | December 2023 – March 2024

Facilitated critical medical communications in healthcare settings:

- Applied strong communication skills valuable for technical documentation and client interactions
 - Gained domain expertise in healthcare terminology and workflows relevant to medical software development
 - Managed high-pressure communication scenarios requiring precision and attention to detail
-

3. Software Developer at DC Tech | March 2023 – June 2023

Developed award-winning prototype for environmental disaster prevention:

- Architected and implemented full-stack solution for flood and wildfire prevention
 - Integrated machine learning models for predictive analysis
 - Successfully secured incubator support in Porto through competitive pitch
-

4. Programming Teacher at School Conservatorio Da Musica | October 2022 – June 2023

Designed and delivered programming curriculum for 100+ students across grade levels:

- Created progressive coding exercises utilizing Scratch, HTML/CSS, and JavaScript
 - Developed browser-based code editor with real-time preview for student practice
 - Implemented gamification elements resulting in 85% student engagement rate
 - Built automated assessment system to provide immediate feedback on student code
 - Applied teaching experience to improve documentation skills and code clarity
-

5. Software Developer at 2GF Innovation Technology | October 2021 – October 2022

Participated in frontend development for cross-border family connection platform:

- Built responsive interfaces with React and TypeScript, supporting 10,000+ monthly active users
- Implemented WebRTC for real-time video communication features
- Created reusable component library reducing new feature development time by 40%
- Developed cross-platform mobile application using Flutter and Dart
- Integrated Firebase for authentication and real-time database functionality
- Implemented offline-first architecture allowing users to maintain functionality with intermittent connectivity
- Collaborated with a distributed team across three time zones using agile methodology

5. Software Developer at 2GF Innovation Technology | July 2021 – September 2021

Developed automation solution for AZA operations in Chile:

- Built Node.js middleware to integrate with SAP enterprise systems
 - Created custom API endpoints for data synchronization between web platform and legacy systems
 - Implemented data validation and transformation pipelines to ensure system integrity
 - Developed interactive dashboards with ReactJS to visualize operational metrics
 - Configured MongoDB schemas optimized for reporting and analytics
 - Contributed to daily stand-ups and sprint planning with remote team of 7 developers
-

6. Digital Marketing Consultant at JB Virtual | February 2021 – March 2023

Co-founded and scaled digital marketing agency:

- Developed custom web analytics dashboard using JavaScript and Google Analytics API
 - Built automated social media scheduling and reporting tools
 - Created dynamic content management system for client campaign materials
 - Applied analytical skills to measure and optimize campaign performance
 - Gained valuable client communication experience applicable to developer-client interactions
-

EDUCATION

- **Masters in Business Administration (ESG Focus)**

- University of Beira Interior (UBI) Executive, Portugal – **2024 – Present**

- **Bachelor's Degree in Computer Science**

- University of Beira Interior (UBI), Portugal – **2018 – 2021**
- Final Project: Badge Management System
 - Developed full-stack application using ReactJS, Flutter, and Firebase
 - Implemented secure authentication and role-based access control
 - Created real-time synchronization between web and mobile platforms
 - Technologies: JavaScript, React, Flutter, Firebase, Git

- **Bachelor's Degree in Information Technology (interrupted)**

- Sharda University, India – **2017 – 2018**
-

LANGUAGES

- **Portuguese (Native)**
- **English (Full spoken and written proficiency)**

VOLUNTEER EXPERIENCE

- **Bible Teacher (2009 – Present)**

- Conduct regular Bible education sessions, developing strong communication and teaching skills
- Foster meaningful discussions on complex topics with people from diverse backgrounds
- Demonstrate patience, active listening, and ability to explain complex concepts clearly
- Maintain long-term commitment to community education and support

- **EUSOUDIGITAL Volunteer | March 2022**

- Participated in a program aimed at helping adults acquire basic digital skills
- Assisted in training adults to use essential online services, including email, web browsing, and digital public services
- Contributed to the goal of training 30,000 volunteers and creating 1,500 digital skills training centers across Portugal

- **EU SOU + Project Volunteer | November 2021 – March 2022**

- Participated in a multidisciplinary team project initiated by the Covilhã Municipality to combat school failure
- Contributed to activities supporting family animation and family support components
- Assisted in developing and reinforcing socio-educational interventions for children and youth in the Covilhã county
